

Tens

There were 10 things in each picture.

How many are missing ?

There are _____ balls missing.

There are _____ bats missing.

There are _____ sticks missing.

There are _____ bottles missing.

Fill in the missing numbers below.

$1 + 9 = \square$

$\square + 1 = 10$

$7 + \square = 10$

$2 + 8 = \square$

$8 + \square = 10$

$\square + 5 = 10$

$3 + 7 = \square$

$\square + 3 = 10$

$\square + 2 = 10$

$4 + 6 = \square$

$6 + \square = 10$

$9 + \square = 10$

$5 + 5 = \square$

$5 + \square = 10$

$\square + 4 = 10$

Nines

There were 9 animals in each picture.

How many are missing ?

There are _____ bats missing.

There are _____ deer missing.

There are _____ zebras missing.

There are _____ cats missing.

Fill in the missing numbers below.

$1 + 8 = \square$

$\square + 1 = 9$

$9 - 1 = \square$

$9 - \square = 6$

$2 + 7 = \square$

$\square + 4 = 9$

$9 - 2 = \square$

$9 - 8 = \square$

$3 + 6 = \square$

$\square + 2 = 9$

$9 - 5 = \square$

$9 - 4 = \square$

$4 + 5 = \square$

$\square + 0 = 9$

$9 - 7 = \square$

$\square - 6 = 3$

Fifteens

There were 15 sharks in each picture. How many are missing?

There are _____ sharks missing.

There are _____ sharks missing.

There are _____ sharks missing.

There are _____ sharks missing.

Fill in the missing numbers below.

$1 + 14 = \square$

$\square + 1 = 15$

$15 - 1 = \square$

$15 - \square = 3$

$2 + 13 = \square$

$5 + 10 = \square$

$\square - 2 = 13$

$\square - 9 = 4$

$3 + 12 = \square$

$\square + 7 = 15$

$15 - 5 = \square$

$15 - \square = 7$

$4 + 11 = \square$

$15 + 0 = \square$

$\square - 7 = 8$

$\square - 2 = 13$

Fifteens

There were 15 sharks in each picture. How many are missing?

There are _____ sharks missing.

There are _____ sharks missing.

There are _____ sharks missing.

There are _____ sharks missing.

Fill in the missing numbers below.

$1 + 14 = \square$

$\square + 1 = 15$

$15 - 1 = \square$

$15 - \square = 3$

$2 + 13 = \square$

$5 + 10 = \square$

$\square - 2 = 13$

$\square - 9 = 4$

$3 + 12 = \square$

$\square + 7 = 15$

$15 - 5 = \square$

$15 - \square = 7$

$4 + 11 = \square$

$15 + 0 = \square$

$\square - 7 = 8$

$\square - 2 = 13$
